Cinebyte

A React-Powered Movie Discovery App.

- Built with React.js: Leveraged component-based architecture for clean code and scalable UI.
- Live Search with TMDB API: Fetches real-time movie data with filters for movies and TV shows.
- Dynamic Movie Details Page: Renders full movie info— poster, plot, ratings, genre and Trailer—on user click.
- Fully Responsive Design: Built with Tailwind CSS for a mobile-first, pixel-perfect layout.

Delulu-Ai

Ai-powered chat bot with custom instruncitons.

- Powered by Gemini API to generate intelligent, responses.
- Implemented custom system instructions to control the chatbot's behavior and tone.
- Built a dynamic frontend interface using HTML, CSS, and JavaScript.
- Integrated GSAP for smooth and engaging animations throughout the UI.
- Designed with full responsiveness to ensure usability across all devices.

Obys Agency clone

Interactive Portfolio with Smooth UX/UI

- Recreated the Obys Agency website with a strong focus on high-end UI/UX design.
- Built using HTML, CSS, and JavaScript with no frontend frameworks.
- Integrated GSAP and ScrollTrigger to create smooth, timeline-based animations.
- Used Locomotive Scroll for inertia-based smooth scrolling effects.
- Added a custom cursor for a modern and interactive feel.
- Fully responsive design optimized for desktop and tablet experiences.
